

## The GLS Advantage

Global Logistics Solutions was founded in 1996 to meet the growing need for a single source supplier of tailored logistics solutions. With a portfolio of related services for supply chain optimization, we provide multi-modal transportation solutions, from operations through final invoice. GLS works closely with our clients to ensure optimum performance of this complex element of the customer fulfillment process. Our full range of services includes strategic alignment of your logistics needs, planning, shipping, warehousing, delivery, reverse logistics, and performance management.

### Proven track record

- 13 years providing value added solutions for our customers domestic and international shipping needs
- Over 35 years of combined management experience in international supply chain development, sales and marketing, performance management/optimization, business process development/implementation, and logistics support.

### Ease of use

- Automated on-line web based warehousing, shipping and documentation
- One source shipment tracking

### Lower total cost

- Non-asset based company
- Low overhead through the use of web enabled technology and automation

### Customized solutions

- Independent of major carriers therefore, free to use the most cost effective solution available

### High level of customer service

- Personalized shipping event management

Global Logistics Solutions (GLS) can assist your company in developing core logistics processes for Plan, Source, Make, Deliver, and Return utilizing standard terminology, establish common metrics with associated benchmarks, and compare your organization to best practices. GLS not only works with you to develop and optimize your process, but we stay with you as your logistics partner to ensure cost effectiveness, efficiency, and customer satisfaction.
