

eCommerce Solutions

Global Logistics Solutions (GLS) offers both warehousing and shipping solutions in support of internet based eCommerce sales. Not only can GLS negotiate favorable rates with major large and small package carriers, we can locate warehousing of product globally, if required, to optimize on delivery to your customer.

Our warehousing capabilities include picking, packaging, and shipping of both large and small orders. Our integrated warehousing and shipping processes provide a user friendly interface to manage inventory and fulfill internet based sales orders.

Our highly automated and integrated warehousing/ distribution services minimize resource allocation, reduce errors and lowers overall costs associated with processing orders.

GLS can also assist in developing an online store, or integrate with your existing website to seamlessly interface with GLS warehousing and distribution services. This interface can also extend to EDI (Electronic Data Interface) transactions.

Global Logistics Solutions can develop a custom tailored process to your business model and help develop links necessary to seamlessly process orders.

Contact Global Logistics Solutions to discuss how GLS can contribute towards providing a seamless integrated logistics environment for your company.
